Amendments to the Specification

Please add the following new paragraph after page 50 of the Specification:

--Intramedullary Nail and Associated Method

ABSTRACT OF THE INVENTION

An intramedullary nail for use with a first fastener and a second fastener for use in orthopaedic surgery is provided. The nail includes a body defining a longitudinal axis of the body. The body defines an aperture through the body. The aperture has a first portion for cooperation with the first fastener to provide dynamic fixation and a second portion for cooperation with the fastener nail to provide static fixation.--
